

fergus

*good dog, great software*

*Fergus is a complete software solution that puts you in control of your trade business.*

Fergus was developed to integrate all of your business processes into a single software package. Fergus will give you an accurate sense of what is happening within your business, show where all your jobs are and work out your profitability at the click of a button.

***Fergus makes sure that all your staff see the right information at the right time. All the points of contact are streamlined and recorded so that you can see the position and status of all your projects at a glance.***

Fergus automates your paperwork and enables you to handle each piece as few times as possible. Merchant invoicing, time tracking, back costing, record keeping, reporting and nearly every other aspect of day to day business is made easier and far less time consuming, saving you real time and money.

With Fergus you will find that slippage, uncharged time, unbilled materials, under- or over-quoting, unaccountable tradesmen, miscommunications and customer disputes are all reduced when everyone has access to correct information, instantly and always up to date.

### ***Workflow and Usability***

Fergus has been designed to track jobs from start to finish, from quoting or estimating to invoicing and payment. Customers will always be up to date and informed. No job will ever be forgotten about with our job status board. Staff will know exactly what they have scheduled for the day, and have all information available with the click of a button.

Fergus is always learning new tricks at no added cost to you. You will enjoy the benefits of software that's being constantly improved.

# >> Main Features
